Milestone 1-2 Combined Submission Guide

Important: We are using an automated validation system for this submission. If report comes as Passed then only submit the file in Submission Drive

Validity Check Form: Link

Please follow these steps carefully to ensure a successful submission.

Step 1: Create the Parent Folder

First, create a new folder on your computer. The folder name must strictly follow this format: `team-XXX-milestone-1-2`

- Replace `XXX` with your 3-digit team number.
- If your team number is a single or double digit, you **must** add leading zeros.
- **Examples:**
  - Team 5 -> `team-005-milestone-1-2`
  - Team 25 -> `team-025-milestone-1-2`
  - Team 111 -> `team-111-milestone-1-2`

Step 2: Add the Required Files

Place the following **10 files** inside your newly created folder. The filenames must match this list exactly (all lowercase, dashes instead of spaces, exact file extensions).

- `problem-and-features.txt`
- `user-identification.txt`
- `user-stories.txt`
- `design-of-component.txt`
- `class-diagram.png`
- `er.png`
- `er-dbml.txt` *(Text file containing your database markup)*
- `sprint-schedule.txt`
- `gantt-chart.png`
- `kanban-board.png`

Pro-Tip for your ER Diagram: We highly recommend using dbdiagram.io to design your Entity-Relationship diagram. It allows you to write your database schema in DBML (Database Markup Language) and automatically generates the visual diagram. You can export the diagram as your `er.png` and simply copy/paste your DBML code into your `er-dbml.txt` file.

Strict Rule: No additional files, drafts, PDFs, or sub-folders are allowed. The automated system will fail your submission if it finds *any* unauthorized extra files.

Step 3: Compress (ZIP) the Folder

You must zip the **parent folder itself**, not just the individual files. If you just select the 10 files and zip them, you will fail the structural check.

- **Windows:** Right-click the `team-XXX-milestone-1-2` folder and select **Compress to ZIP file**.
- **Mac:** Right-click the `team-XXX-milestone-1-2` folder and select **Compress "team-XXX-milestone-1-2"**. *(Note: The automated system ignores hidden Mac system files like `.DS_Store` or `__MACOSX`, so Mac users will not be unfairly penalized).*

Step 4: Submit via Google Form

1. Go to the Google Form link provided.
2. Enter your email address and your Team Number.
3. Upload your `.zip` file and click Submit.

Step 5: Check Your Email

Within a few moments of submitting, the automated system will email you a report.

- **If you PASS:** The email will confirm that all files and folders are correct. Then upload in the submission drive.
- **If you FAIL:** The email will tell you exactly what went wrong (e.g., a file was missing, you included an extra file, or the parent folder was missing). You must fix the errors on your computer, create a new ZIP file, and submit the form again.
